## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 19 is rejected under 35 U.S.C. 102(b) as being anticipated by Ehman et al. (US 6,021,050).

Claim 19:

Ehman et al. shows a wiring board (10) comprising a board of at least one layer comprising a conductor part, the conductor part comprising conductor patterns (metallic conductor 52) deployed on one surface of the board (12 or 14) and at least a part of the conductor (52) is formed by an electrically conductive magnetic thin film (magnetic or ferrite ink 54 – col. 5, lines 27,28); and magnetic thin films deployed at least on part of the conductor part (54 placed on 52).

### ***Allowable Subject Matter***

Claims 22 – 38 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ikeda et al. – shows a printed circuit board with magnetic thin film.
